Topic: ISLAND ECOLOGY--KELP FORESTS OF CATALINA ISLAND.

This course in community ecology examines the Macrocystis (kelp) forest communities of Santa Catalina Island. Studies include the principles of community ecology and community analysis, the biology of kelp, and the identification and biology of the algal, invertebrate and fish assemblage that form the communities. An emphasis is placed on understanding the role that biological interactions play in determining the community structure and organization. This course is taught in 1 unit modules. One class meeting on campus is followed by a snorkeling observation of the kelp forest community on Santa Catalina Island.

Note: This course is offered on a pass/no-pass basis only. Students do not have the option of receiving letter grades.

Note: This class consists of an on-campus lecture and laboratory in CFS 91008 on Sunday, May 4, from 10:00 a.m. to 2:30 p.m.

On Sunday, May 18, there will be an all day snorkeling trip to Catalina Island. Topic: MARINE ECOLOGY--THE BIOLOGY OF THE MARINE WETLAND ENVIRONMENT OF THE PUNTA BANDA, BAJA CALIFORNIA, MEXICO.

This course in marine biology examines the wetlands communities of the Estero de Punta Banda region of Baja California, Mexico. Studies include the principles of community ecology and community analysis, and the identification and biology of the algal, invertebrate, fish and bird assemblage that form the communities. An emphasis is placed on the morphological and physiological adaptations of wetlands plants and invertebrates, the feeding and behavioral adaptations of wetlands birds, and on understanding the role that biological interactions play in determining the community structure and organization. The effects of human activity on changes in the wetlands communities of Baja California with respect to economic and political forcing functions, along with cultural concomitants are examined. This course is taught in 1 unit modules. One class meeting on campus is followed by a two day field study in the Estero de Punta Banda region of Baja California, Mexico.

Note: This course is offered on a pass/no-pass basis only. Students do not have the option of receiving letter grades.

Note: This class consists of on-campus lecture and laboratory in CFS 91008 on Sunday, March 23, from 10:00 a.m. to 2:30 p.m.

A two-day field trip to Punta Banda, B.C., Mexico (just south of Ensenada), will be led by the instructor on Saturday and Sunday, March 29 & 30, but students will be expected to arrive at the accommodation in Mexico on Friday night, March 28.

CHEMISTRY 101 READINESS TEST

It is recommended that all students planning to enroll in Chemistry 101 as their first chemistry course at Pierce College take the Chemistry 101 Readiness Test at the Assessment Center located in the Student Services Building. Contact the Assessment Center at (818) 719-6499 for an appointment and an information sheet. Prerequisite courses or placement results taken at other accredited colleges or universities must be presented to the Counseling Office to be substituted for the Pierce Chemistry 101 Readiness Test.

Results from the test are intended to assist students in enrolling in the class where they are most likely to succeed. Upon completing the test, students are advised of their placement and given their authorization to enroll. Students must pass the test within one year of when they register to enroll in Chemistry 101. A student who passes the test may take the exam more than once to maintain this recency requirement, but a student who fails may not repeat the test. Students who wish to challenge the recommendation of the readiness test should consult the Chemistry Department Advisor, Dr. Izzy Goodman, at (818) 719-6464 or goodmaii@piercecollege.edu. The prerequisites for Chemistry 101 are not waived on the basis of any assessment test scores.

SEQUENCE OF ENGLISH COMPOSITION COURSES

The English department offers a sequence of classes designed to coincide with students' reading and writing ability on entering college.

ENGLISH 21

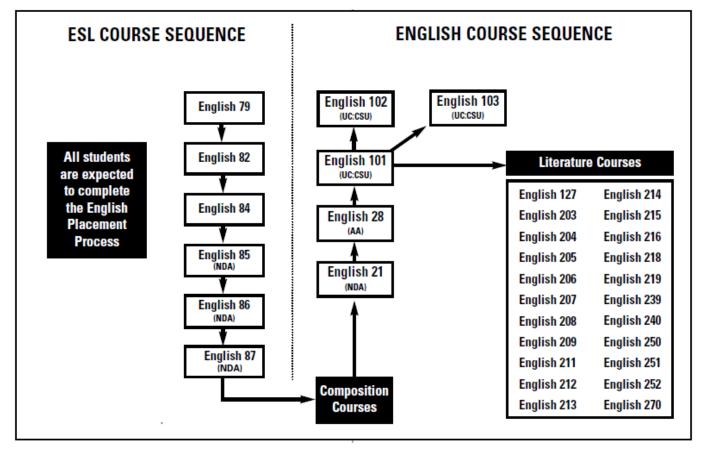

This English fundamentals course concentrates on improvement of writing skills, particularly sentences and paragraphs, and reviews the basics of punctuation, spelling and sentence structure.

ENGLISH 28

This is the course designed to assist the student to make a successful transition to English 101. It emphasizes grammar, sentence structure, paragraph and essay writing.

ENGLISH 101

This is the composition course required for students who plan to transfer to a four year college. It emphasizes expository reading and essay writing, research techniques and semantics. Students in English 101 are expected to write well-organized, grammatically correct compositions of 700 words and more.

ENGLISH PLACEMENT PROCESS

The results of the English Placement Process or a valid English Enrollment Authorization Form must be on file in order to enroll in English 21, 28, English 82, 84-87, or English 101, 102, 103.

All students planning to enroll in an English course for the first time are expected to complete the English Placement Process at the Pierce College Assessment Center (Student Services Building). Visit the Assessment Center website to make an appointment and obtain sample test information. Placement results or prerequisite courses taken at other colleges may be presented to the Counseling Office to be substituted for the Pierce English Placement Process.

Upon completing the process, students are advised of their placement and given an authorization to enroll in that course. Students seeking an explanation of their scores or authorization to enroll in a course other than that in which they have been placed must meet with an English Department advisor.

Students need to provide evidence of prerequisite completion either through coursework in the Los Angeles Community College District, by completing the Pierce College English Placement Process, or through transcripts from other schools presented at the Counseling Office. STUDENTS WHO FAIL TO ATTEND THE FIRST CLASS MEETING MAY FORFEIT THEIR PLACE IN THE CLASS.

ENGLISH 21-ENGLISH FUNDAMENTALS (NDA) - 3 UNITS

Prerequisite: English 87 with a grade of "C" or better, or appropriate skill level demonstrated through the English Placement Process.

Mathematics Department Chair: Robert Martinez. Phone: 710-4347. Office: MATH 1409-E. Faculty Advisors: Zhila Tabatabai, Thom Putnam.

MATHEMATICS PLACEMENT PROCESS:

Students who have not completed a college mathematics course must complete the Mathematics Placement Process at the Pierce College Assessment Center located in the Student Services Building. Visit the Assessment Center website to make an appointment and obtain sample tests. Review is highly recommended. Also, visit the Assessment Center website to sign up for the Assessment Prep Workshop Series. Placement tests are given at four levels: Algebra Readiness, Elementary Algebra, Intermediate Algebra, and Precalculus. Upon completing the process, students are advised of their recommended placement and given an authorization to enroll in that course. Students who wish to challenge the recommendation of the assessment test should consult a Mathematics Department advisor.

Indicated prerequisites for mathematics courses are not waived on the basis of any assessment test scores.

**Note: Pierce prerequisite or the equivalent course at another accredited college or university.

Information regarding special Math student success programs and pathways may be found at www.piercecollege.edu/departments/mathematics/mathsuccess.asp.

Some sections require Internet access for homework.

Some sections require graphing calculators. A limited number of TI-83 and TI-84 calculators are available for rent from the department on a firstcome, first-served basis. Go to MATH 1409C to get the rental form.

Information regarding specific course needs may be found on the instructor's web page.
