

## Request for Limited Math and English Courses

If English, math, statistics, or other quantitative reasoning coursework is required for a student's major, a student may enroll in the courses at the transfer level. Los Angeles Pierce College highly recommends that students use the [program mapper](#) and the identified Math and English courses. Students are encouraged to and can register for transfer level courses. Tutoring, concurrent support courses, and support-enhanced courses are also available in the district.

Students should consult a counselor and/or the catalog about courses required for the major and on support options.

Pre-transfer level English (English 28) and math (Math 75, 134, 228A) courses are available to students in the student populations:

- Students enrolled in a noncredit ESL course who have not graduated from a United States high school or been issued a high school equivalency certificate;
- Students with documented disabilities in educational assistance classes, as described in Section 56028 of Title 5 of the California Code of Regulations, who are otherwise not able to benefit from general college classes even with appropriate academic adjustments, auxiliary aids, and services;
- Students enrolled in adult education programs who have not graduated from a United States high school or been issued a high school equivalency certificate;
- Current high school students in dual enrollment; or
- Pursuing a Numerical Control Programming Certificate of Achievement.

If interested students belong to one of these populations, they can [complete this form](#) to indicate interest in one of the pre-transfer classes so the College can review and document eligibility.

Thank you.
