CHEM 211-Organic Chemistry For Science Majors I (UC/CSU) - 5 Units

Requirement Designation: Meets Cal-GETC-5A and 5C

Enrollment Requirement: Prerequisite: CHEM 102 or its equivalent with a grade of "C" or better. For courses completed outside of the LACCD, proof of eligibility must be taken to Counseling.

This course is the first part of a two semester organic chemistry course sequence. Students are introduced to organic molecular structures, bonding, nomenclature including conformational analysis, potential energy plots, hybridization, stereochemistry and functional group chemistry, with emphasis on reactions and reaction mechanisms. It also includes the applications of instrumental methods in functional group analysis and identification of molecular structures. In the laboratory students learn the essential skills and techniques of preparation, isolation, purification, and analysis of organic compounds by employing standard and modern instrumental methods. This course also emphasizes the use and interpretation of Nuclear Magnetic Resonance (NMR), Infrared (IR)

Spectroscopy and Gas Chromatography (GC) in the analysis and identification of organic compounds. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

Requirement Designation: Meets Cal-GETC-5A and 5C

Enrollment Requirement: Prerequisite: CHEM 211 or its equivalent with a grade of "C" or better. For courses completed outside of the LACCD, proof of eligibility must be taken to Counseling.

This course is a continuation of Chemistry 211 with emphasis on the remaining functional groups and aromaticity. Emphasis is put on reactions and reaction mechanisms, stereochemistry, multi-step

synthesis of a variety of organic compounds such as aromatic compounds, alcohols, phenols, amines, heterocyclics, aldehydes, ketones, carboxylic acids and their derivatives. The structures, formation and reactions of enoles and enolate anions are also studied. The structures and functional group reactions of biological molecules such as carbohydrates, amino acids, polypeptides, lipids and nucleic acids are discussed. The laboratory work presents more techniques of multi-step synthesis, isolation, purification, and analysis of organic compounds using conventional and modern instrumental methods. This course also emphasizes the use and interpretation of Nuclear Magnetic Resonance (NMR), Infrared (IR), Mass Spectroscopy (MS), Ultraviolet (UV), and Gas Chromatograph (GC) in the analysis and identification of organic compounds. The Chem. 211 and 212 sequence satisfy the one year organic chemistry requirement for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

Pierce College is in the process of transitioning its English classes to a new statewide subject code, ENGL. For the 2025-2026 academic year, some of our classes use the new code ENGL, while many other classes are still listed under the full name, "English." If you do not see your desired class listed in the search, please be sure to check both subject names, ENGL and English, to find the class you wish to add.

In keeping with AB 1705, students who have graduated from a US High School within the last 10 years are eligible to enroll in ENGL C1000 (formerly English 101) automatically. The college makes the following recommendations based on high school GPA:
GPA greater than 2.6 -- ENGL C1000
GPA between 1.9 and 2.6 -- ENGL C1000 and recommended enrollment in English 72, a support course
GPA less than 1.9 -- ENGL C1000 and required enrollment in English 72, a support course
Students who are not able to provide enough information for automated placement, who have been away from high school for more than 10 years, or who did not attend or graduate from a US high school or earn a

GED or CA High School Proficiency certificate, may use the Guided Self-placement process. This will likely involve meeting with a counselor or other college officer to discuss topics such as the following in order for the student to make a well-informed decision:
-Courses taken and grades received
-The transfer-level English and math courses offered at the student's home college, and which of them (if any) are required for the student's chosen major, general education plan, or transfer plan
-The support courses and services offered to students enrolled in transfer-level courses
-Students' rights under the AB 1705 law
The Guided Self-placement process cannot require the student to take any exam or test, solve any problems, provide any writing samples, or review any sample questions, problems, or prompts.

If English coursework is required for a student's major, the student may enroll directly in the transfer-level course, ENGL C1000 (formerly English 101). Los Angeles Pierce College highly recommends that students use the program mapper and enroll in the identified English course. Students are encouraged to and can register for transfer-level courses. Pierce offers ample support for students in transfer-level English through tutoring, a concurrent support course (English 72), and more resources available through the English department.
Pre-transfer level English (English 28) is available only to students in certain student populations, including students who have not yet graduated from high school, and students with academic accommodations. If you wish to enroll in English 28, complete an interest form so the College can review and document eligibility - https://forms.office.com/r/VnWRN0NZeg .

English As A Second Language

English Department Chair: Chris Corning.
Phone: 710-4102. Office: FO 3105.
E-mail: corninc@piercecollege.edu.
Faculty Advisor: Brad Saenz.
ENGLISH PLACEMENT PROCESS FOR NON-NATIVE SPEAKERS OF ENGLISH.
Students who apply to the Los Angeles Community College District (LACCD) using CCCApply or have updated their placement information using the LACCD MMAP Web Form on their To-Do Checklist will be placed into tiers (groups) of courses in English. Those who choose to complete ESL placement will be placed into an ESL tier, as well. Each tier includes the transfer-level courses cleared for enrollment, as well as optional or required support courses intended to help students succeed in transfer-level coursework in that tier. These tiers will be combined to produce an "E" placement level (English plus ESL, if completed), which will be shown on the online Student Portal Assessment Page.
ENGLISH and ESL Placement Criteria
English as a Second Language (ESL)
Each LACCD college uses its own criteria for ESL placement. In most cases, these involve a combination of a placement exam score and the Multiple-Measures Assessment Project (MMAP) placement criteria, which place students based on their anticipated success rates using high school performance data (like grade point average). Note: ESL placement does not override English placement.
Guided Self-Placement
Students who are not able to provide enough information for automated placement, who have been away from high school for more than 10 years, or did not attend or graduate from a US high school or earn a GED or CA High School Proficiency certificate, may use the Guided Self-placement process. This will likely involve meeting with a counselor or other college officer to discuss topics such as the following in order for the student to place him/herself:
-Courses taken and grades received
-The transfer-level English and math courses offered at the student's home college, and which of them (if any) are required for the student's chosen major, general education plan, or transfer plan
-The support courses and services offered to students enrolled in transfer-level courses
-Students' rights under the AB 705 law
The Guided Self-placement process cannot require the student to take any exam or test, solve any problems, provide any writing samples, or review any sample questions, problems, or prompts.

In keeping with AB 705, students who have graduated from a US High School within the last 10 years are eligible to enroll in transfer level math, specifically STAT C1000. However, students in STEM or business majors, may need a prerequisite course. The college makes the following recommendations based on high school GPA or high school course information:

GPA greater than or equal to 2.3 - STAT C1000

GPA less than 2.3 - STAT C1000. Students are highly recommended to enroll in Math 228A followed by Math 228B, a two-semester statistics sequence.

Students may enroll in the following depending on their grade in High School Intermediate Algebra or Integrated Math 3 (or equivalent or higher):

A grade of B or better - Math 215, 238, or 240

A grade less than a B - Math 134, a prerequisite course

Students who are not able to provide enough information for automated placement, who have been away from high school for more than 10 years, or did not attend or graduate from a US high school or earn a GED or CA High School Proficiency certificate, may use the Guided Self-placement process. This will likely involve meeting with a counselor or other college officer to discuss topics such as the following in order for the student to place him/herself:
-Courses taken and grades received
-The transfer-level English and math courses offered at the student's home college, and which of them (if any) are required for the student's chosen major, general education plan, or transfer plan
-The support courses and services offered to students enrolled in transfer-level courses
-Students' rights under the AB 705 law
The Guided Self-placement process cannot require the student to take any exam or test, solve any problems, provide any writing samples, or review any sample questions, problems, or prompts.

-Courses taken and grades received
-The transfer-level English and math courses offered at the student's home college, and which of them (if any) are required for the student's chosen major, general education plan, or transfer plan

-The support courses and services offered to students enrolled in transfer-level courses
-Students' rights under the AB 705 law
The Guided Self-placement process cannot require the student to take any exam or test, solve any problems, provide any writing samples, or review any sample questions, problems, or prompts.
